Vikas Upre

Hyderabad, Telangana • 7893257102• uvikas355@gmail.com

PROFESSIONAL SUMMARY

Results-driven Web Developer with 3+ years of experience specializing in designing and developing efficient server-side applications using Python and the Django framework. Proficient in working with databases and implementing RESTful APIs to create robust and scalable web solutions. Skilled in problem-solving and collaborating with cross-functional teams to deliver high-quality projects.

WORK EXPERIENCE

Junior Software developer
TVISHA TECHNOLOGIES PRIVATE LIMITED- Hyderabad, TS, July 2020 – present

Tvisha Technologies is a software development company that offers multi-platform services including mobile app development, e-commerce, deployment, and outsourcing.

PROJECTS

Name: E-commerce Photo Printing Site (Map - Monalbumphoto):

Description: This project involved the development of an e-commerce platform that allows customers to upload their photos, customize them, choose desired prints, and place orders for photo printing.

Roles & responsibilities:

- Developed an e-commerce platform that allows customers to upload their photos, customize them, choose desired prints, and place orders for photo printing.
- Designed and implemented the user interface using HTML, CSS, and JavaScript, resulting in a seamless and user-friendly shopping experience.
- Integrated special offer functionality using Python Django, allowing customers to receive discounts on selected products.

Name: Chemical Company Showcase App (Knowde):

Description: The Knowde project aimed to create a comprehensive web application that showcases various chemical companies, their products, and related information.

Roles & responsibilities:

- Created a comprehensive web application that showcases various chemical companies, their products, and related information.
- Involved in database design modeling for web applications, ensuring optimal data structure and efficient data retrieval.
- Optimized database servers, resulting in a 30% reduction in query response times and improved overall performance.
